The Annual Yale Pediatric Update was started 15 years ago, in response to requests for high quality CME addressing advances in the field of pediatrics, and topics of practical interest. The course is designed to meet the educational needs of pediatric practitioners seeking tools, resources, and evidence-based recommendations for evaluating and managing a variety of both common and potentially serious pediatric health conditions. This year’s topics include: Foreign Body Ingestions, Otitis Media Updates, Approach to Genetic Testing, Management of Umbilical Hernias, Effects of Current Opioid Crisis on Children, Office Procedures, Childhood Melanoma, Pediatric Dental Pearls, and Educational Advocacy for Children with Special Needs.
