The Annual Yale Pediatric Update was started 14 years ago, in response to requests for high quality CME addressing advances in the field of pediatrics, and topics of practical interest. This year's course has been designed to meet the educational needs of pediatric practitioners seeking tools, resources, and evidence-based recommendations for evaluating and managing a variety of both common and potentially serious pediatric health conditions. Topics include: concussion rehabilitation, office management of hypertension, update on movement disorders, trends in performance enhancing substance use, dermatology pearls, common GU and surgical complaints, evaluation of aches and pains, choosing the right antibiotics and effects of social media on teenage girls.

Conference Faculty

COURSE DIRECTOR
Linda Arnold, MD
Associate Professor of Pediatrics
Section of Emergency Medicine

FACULTY
Robert Baltimore, MD
Professor of Pediatrics (Infectious Disease)
and of Epidemiology
